

Guiding Parking's Future™

What you have heard is true. The industry has been begging for a cost-effective Parking Guidance System (PGS) and now it has it with the ECO Falcon Vision™. Projects that never considered PGS are moving forward with ECO Falcon Vision™. Why use Barrier Counting Systems that require counts to be manually verified throughout the day? Why use Infrared, Lidar, Pucks, Ultrasonic or any non-camera-based system ever again? Non-camera-based systems don't add to safety, security and are not positioned for the future. Camera-based PGS systems enjoy the industry's highest accuracy levels.

NO OTHER CAMERA BASED PGS

- Incorporates into ECO's domestic LED parking garage lighting fixture
- Is specially designed for center run type II discharge
- Eliminates parasitic conduit by using a wireless mesh connection
- Is a complete Wireless Lighting Control System (Title 24)
- Stores ALL activity (pedestrian and vehicular) on-board as actual video, excellent for forensic and event re-creation use
- Can live-stream up to 64 cameras to augment security, using ONVIF protocol and Network Video Recorder (NVR)
- Offers a measurable and verifiable Return On Investment (ROI)
- Receives utility incentives/EPACT 2005 tax deductions/
PACE financing
- Is cost-effective and easy to install.

It's here and it's proven! The ECO Falcon Vision™ Parking Guidance System. After years of development, the most sophisticated, modern and elegant PGS system on the market is here to take the industry by storm. With installed projects from the Silicon Valley to the beaches of Florida, owners are "giddy" about ECO Falcon Vision™.

From the starting gate, this Secretariat of a PGS is winning the industries top awards and leaving the competition many lengths of *gangly*, *unsightly*, & *costly conduit* behind. From the NPA's Sustainable Project of the Year, to the IPMI's Sustainable Project of the Year, who can compete with the World's ONLY Integrated PGS?

Stay tuned for revolutionary advancements in PGS through ECO Falcon Vision™. Don't sit back and wait for the future....It's here, and ECO Falcon Vision™ is Guiding It! With Evergreen Software™, ALL advancements and future features are always available on your ECO Falcon Vision™ PGS.
